

Docklands is feasible in principle

The location works at precinct level — the final answer depends on the property.

PREFERRED SEARCH AREA

Collins Street – Victoria Harbour

01

Arrival

Southern Cross, airport coaches, trams and major roads support easy guest and staff access.

02

Hotel operations

Prefer a modern building with loading, a service entrance, goods lift, storage and waste space.

03

Property checks

Confirm room capacity, drop-off access, accessibility, noise and conversion requirements.

An existing hotel may be the faster route

Fewer approvals may be needed when the approved hotel use continues without major works.

MORE LIKELY TO BE STRAIGHTFORWARD

- Existing approved hotel use
- No major structural or external works
- Current permit conditions can be met

LIKELY TO REQUIRE MORE APPROVALS

- New hotel construction
- Conversion from another use
- Additional floors or major building works

Important: this is not automatic — the selected property and its existing permits must be checked.

Four checks before acquisition

Approval remains property-specific, even when an existing hotel is acquired.

- | | | |
|----|------------------------|--|
| 01 | Planning | Approved hotel use, permit conditions and any amendment triggers |
| 02 | Building | Class 3 classification, occupancy permit, fire safety and accessibility |
| 03 | Operations | Food, liquor and other registrations transferred or updated where required |
| 04 | Site conditions | Loading, waste, parking, signage, noise and delivery-hour controls |

Proceed with Docklands property searches — subject to full due diligence.
